JEEVAN KUMAR

Jeevanshetty9481@gmail.com | 9353819063 | Dakshina Kannada, Karnataka | GitHub | LinkedIn | LeetCode | Portfolio

Objective

MCA student (CGPA 8.23) with strong fundamentals in **Data Structures & Algorithms, DBMS, OOP and Operating Systems**, and hands-on experience building full-stack applications with REST APIs and SQL/NoSQL databases. 1st place winner of a national 24-hour hackathon and author of an ML research paper accepted at COSMIC 2026. Seeking opportunities where I can write clean, modular, well-tested code and contribute to end-to-end product delivery.

Education

MCA – NMAM Institute of Technology, Nitte — CGPA: 8.23 / 10 | 2025 – 2027 (Expected)
BCA – St. Philomena College, Puttur — 2022 – 2025
PUC (Commerce) – SDM College, Ujire — 2020 – 2022
SSLC – St. Theresa High School, Belthangady — 2020

Skills

Languages: Java, JavaScript, SQL, HTML, CSS
CS Fundamentals: Data Structures & Algorithms, OOP (SOLID), DBMS (Normalisation, ACID, indexing), Operating Systems, Computer Networks
Web & Backend: React, HTML, CSS, JavaScript, Node.js, Express.js, REST APIs, JWT authentication, Role-Based Access Control, Socket.IO
Databases: PostgreSQL, MySQL, MongoDB (SQL and NoSQL)
Cloud & DevOps: AWS (fundamentals), workflow automation (n8n)
Tools: Git, GitHub, Postman, Google Gemini API integration

Projects

CareerAI – AI-Powered Career Intelligence Platform — GitHub Repo
Tech Stack: JavaScript, React, Node.js, Express.js, PostgreSQL, Google Gemini API

- Built a full-stack platform that automates resume parsing, ATS scoring and mock interviews; integrated the Gemini API (third-party service) to convert PDF/DOCX resumes into structured, queryable data.
- Built the **PostgreSQL** data layer for users, resumes, ATS scores and interview sessions.
- Secured REST APIs with **JWT** and role-based access control; structured the backend in modular layers for maintainability.

BlinkChat – Real-Time Chat Application — GitHub Repo
Tech Stack: React 19, Node.js, Express.js, MongoDB, Socket.IO, Clerk

- Built a real-time messaging platform with group chat, multimedia sharing and role-based admin access, integrating Clerk for authentication.
- Optimised Socket.IO events and MongoDB queries to reduce message latency for concurrent group chats.

Placement Pro – Placement Management System — GitHub Repo
Tech Stack: React, Node.js, Express, MongoDB, n8n

- Digitised the campus recruitment workflow end to end (job posting, eligibility checks, application tracking, shortlisting, real-time status updates) through REST APIs.
- Integrated **n8n workflows** to automate student-query handling and data sync; built role-based dashboards for students, coordinators and admins.

Research

ML-Based Detection of Blockchain Network Attacks and Vulnerabilities — *Accepted, COSMIC 2026*
2026 Third International Conference on Computing, Semiconductor, Mechatronics, Intelligent Systems and Communications

- Built an end-to-end ML pipeline (data preparation, feature engineering, training, evaluation) using Random Forest, SVM and XGBoost for Ethereum fraud detection, reaching **99.19% accuracy**.
- Introduced a novel **Blockchain Threat Risk Score (BTRS)** to quantify risk in a form non-technical stakeholders can act on.

Achievements & Leadership

- **1st place**, Solve-A-Thon 1.0 – 24-hour national hackathon by Dept. of MCA, Srinivas Institute of Technology, Mangalore (Feb 2026).
- Solved 250 problems on LeetCode, building an approach-first problem-solving habit.
- Mentored BCA students during a hackathon in planning, problem-solving and project delivery.
